

XM Satellite radio is something that I PAY for. It's not public radio that has been destroyed by the government regulation. I would appreciate it if the government would stop trying to dictate what I can and cannot hear. Traffic and weather is just another form of news that I can listen to on my way to work. By disallowing this information on XM, the government is just engaging in another form of censorship, which, a lot of officials seem to have forgotten, is not what this country was founded on.
Thank you for your time.
